

The Indiana Democratic Party is committed to making Indiana a place where families thrive. After 20 years of Republican rule, utility rates are skyrocketing, rent is increasing, mortgage foreclosures are double the national average, and childcare is growing more and more scarce. Hospitals are closing their doors while insurance rates balloon past affordable. Hoosiers deserve better! That's why Indiana Democrats are pushing back against the outrageous actions of both the state and national governments.

Instead of playing political games with Hoosiers' lives like mid-decade redistricting, protecting masked agents that terrorize our streets and dismantling affordable healthcare, Democrats are coming to the table with common-sense, Hoosier-backed solutions.

- Indiana leaders like U.S. Congressmen André Carson and Frank Mrvan stand up for policies to keep faith with Hoosier workers and ensure jobs stay in the U.S. They demand government accountability by supporting policies that unmask ICE agents and require body cameras. They're defending the constitution by opposing deadly and costly wars started unilaterally by a rogue president.
- Your legislators in the Senate and House of Representatives Democratic caucuses author targeted bills to get rents under control, take pressure off utility bills, protect access to health care and support child care so parents can work. They put real, workable solutions on the table that focus on affordability and stability
- Local Democrat Mayors and council members work tirelessly to improve roads in your hometowns and build local economic development initiatives. They champion their communities against the supermajority's continued attacks on local control and ongoing defunding of city and county budgets.

Affordability for Every Hoosier

Hoosiers have been crushed under the burden of high inflation and crushing costs of living driven by Trump's tariffs. Every policy Indiana Democrats champion is rooted in the real stories and struggles shared by our constituents. We stand up for families who are doing everything right but still falling behind.

Reduce Healthcare Costs - Access to healthcare should not be a luxury, but a human right. No Hoosier should be denied care because they don't earn enough. Yet, Republicans actually shut down the federal government to deny 364,000 Hoosiers access to the ACA, doubling their insurance premiums. And still insurance company profits rise at record rates. We know that Hoosier Democrats were elected to work for you, not big insurance, which is why we offer and defend patient-first policies.

- Fully restore health insurance subsidies to lower costs for Hoosier patients.

- Extend prescription price negotiations beyond just Medicaid.
- Require insurance companies and pharmacies to pass any savings from prescription rebates or hospital cost reductions back to the consumer.
- Provide relief to Hoosiers burdened with medical debt by prohibiting liens on their primary residence as a means of collection, requiring hospitals to offer payment plans and capping the amount of monthly payments for low-income patients.

Lower Utility Bills - A Republican majority has stood by while Hoosier utility bills increase far beyond affordability and Indiana climbs to third in the nation for shutoffs. You have made your voices loud and clear. This is why elected Democrats continue to champion legislation to lower your bills and keep utility companies beholden to you, not Wall Street.

- Eliminate the sales tax on utilities.
- Enact a moratorium on utility rate hikes.
- End the tax breaks for data centers and require them to pay for their own energy.

Improve Access to Housing - Under Republican control, property taxes and rent continue to increase while housing stock stays limited, as a result Indiana leads the nation in evictions. The Republican supermajority big “fix” saves the average household just over \$200 a year - not even enough to cover a car payment or help with the cost of groceries. Calling this “property tax reform” is absurd. Indiana Democrats offer meaningful solutions to keeping Hoosiers in their homes - affordably.

- Create a path to first time home ownership with buyer tax breaks.
- Increase the renters’ tax deduction and crack down on negligent landlords by allowing tenants to hold rent until they make essential repairs.
- Allow faith institutions to build affordable housing units on their property and reduce restrictions on building tiny homes on personal property.

Education and an Economy that Work for Workers

Treat Childcare as Essential - Access to childcare and Pre-K is the foundation of a strong economy. Without it, parents cannot work, businesses suffer and brain drain accelerates. Yet, Indiana only has childcare spots for 41% of the children who need them, which is why almost 60% of Hoosier parents have had to cut work hours or leave their jobs. This isn't sustainable for families or the economy. While Republicans continue to say the state doesn't have solutions, Democrats are standing up for parents.

- Fully fund the Child Care Development Fund to ensure low-income families can afford to get to work.
- Implement universal pre-k for 3 and 4 year olds.

- Improve childcare worker pay and remove barriers to their employment, such as the ban on their own children being in the room with them.

Fully Fund Public Schools and Better Pay for Teachers - The Democrats have been sounding the alarm on a full-blown Republican attack on public schools and teachers. Indiana's public schools educate 90% of our students and yet Republicans have stripped over \$500 million from them to fund voucher expansions. Money that could be used to implement statewide Pre-K. By banning books and regulating speech they violate 1st Amendment protections while making teachers targets of complaints and public attacks. This is not how we encourage our children to learn or help prepare them for a 21st century workforce. Democrats remain committed to fully supporting public schools and teachers.

- Raise starting teachers to \$60,000 to help slow the loss of teachers to other states and careers.
- Fully fund public schools.
- Require all schools at a certain free and reduced lunch threshold to apply for corporation-wide free and reduced lunch. This would ensure every child eats while reducing expensive and burdensome administrative costs.

Implement Paid Family Leave - Paid family leave programs allow workers to still be paid while taking time off to care for a new child or aging parent. They help businesses retain skilled workers, improve maternal and infant health outcomes, reduce the risks of families falling into poverty, and are supported by over 75% of Americans. Fewer than ¼ of Hoosiers have access to paid family leave and many workers cannot afford to take unpaid leave. And yet, the Republicans keep refusing to hear the Indiana Democrats' bills to establish such a program.

- Incentivize employers to create paid family leave programs.
- Create a statewide family leave program funded through very small payroll tax contributions.

Maintain High Paying Jobs IN Indiana- At \$7.25 an hour Indiana's minimum wage is the lowest pay permitted by the federal government. At this rate, a Hoosier would have to work three full time jobs to afford a two bedroom apartment. Our stagnant wages contribute to Indiana having the highest foreclosure rate in the nation. Despite Republicans touting Indiana as "open for business," we lose critical opportunities because without childcare, Pre-K, strong public schools, parks and thriving neighborhoods, businesses cannot recruit workers to our state. Businesses have been saying this, republicans do not listen. Democrats understand a strong economy is built by workers, not CEOs.

- Raise Indiana's minimum wage to a livable amount such that Hoosiers working full time can afford the basics of living.
- Invest in community improvement initiatives, keep public schools strong, focus on public health and well being, and build and maintain parks.
- Continue to fight to ensure U.S. companies stay U.S. companies.
- Champion unions to ensure workers earn high pay and benefits reflective of their hard work.
- Demand that economic development initiatives, such as data center construction, benefit the workers and communities more than Wall Street. Economic development must pay for its own utilities, provide neighborhood investments, and ensure local residents fill the available jobs.

Freedom

Support Veterans - Hoosier heroes deserve to be honored for their sacrifices, not with empty rhetoric, but with real support from their state and country. Indiana must be a state that prioritizes every veteran's wellbeing.

- Fight the Republican Supermajority in the Statehouse when they decreased veterans' access to the Military Family Relief Fund.
- Require every county to hire a County Service Officer and establish a fund to pay their salaries to ensure Hoosier veterans can access services no matter where in Indiana they live.
- Require discharge counseling for returning veterans to evaluate any needed ongoing services for a successful return to home - and make sure those services are available.

Legalize Marijuana - 84% of Hoosiers believe marijuana should be legal in some form, underscoring that no one in Indiana should go to jail for something legal in 40 states and D.C. Our neighboring states have become the market place for Hoosiers and are scooping up millions of our tax dollars. This is critical revenue that could be invested in Indiana. After more than a decade of Republicans ignoring Democrat proposals it is time to bring Indiana into modern-day.

- Fully legalize marijuana and create the regulatory framework.
- Record expungement for those with marijuana convictions.

Restore Abortion Rights - Despite 59% of Hoosiers supporting abortion in all or some cases, the Republican Supermajority in the General Assembly still forced through their extreme abortion ban. President Trump continues to hold radical views on limiting women's access to this critical healthcare. And while Republicans have held steadfast on reducing women's access to healthcare, 16 hospital obstetrics departments have

closed since 2020 and Planned Parenthood announced the closures of two clinics. This has created women's healthcare deserts in 25% of Indiana's 92 counties. As a result, Indiana has the third highest maternal mortality rate in the nation. This is disgraceful. Democrats have vehemently opposed these bans and the loss of funding to Planned Parenthood that drive the closures of critical healthcare centers.

- Restore abortion rights to Roe v. Wade status.
- Restore funding to Planned Parenthood for wellness exams, STI testing and treatment, and birth control.
- Return privacy and dignity to women's healthcare.

Live Safely in Communities - Public safety is top of mind for Hoosiers. Gun violence is now the leading cause of death for children, police officer positions remain unfilled, parents are worried about dropping their kids off at school, and public gatherings are mass shooting targets. But this still isn't enough to convince Republicans to take real action to get guns off our streets, incentivize safe storage, support community policing initiatives, or fund youth opportunity programs. Instead, they pour \$170 billion into ICE - more than the budgets for all local and state law enforcement agencies combined - so masked agents can instill fear into neighborhoods and detain people who have never committed a crime. Republicans expanded the role of the Indiana National Guard into policing - despite loud opposition from Hoosiers. These actions don't keep neighborhoods safe or reduce school shootings - they are power grabs meant to instill fear. Democrats in Indiana are steadfast in our approach to protect the 2nd Amendment while also protecting lives.

- Incentivize safe storage in homes to reduce youth access to guns.
- Democrats led the way to establish the Indiana Gun Crimes Taskforce, a multi-agency partnership of federal, state, and local law enforcement focused on reducing violent crime in Indiana by seizing thousands of illegal firearms and targeting violent offenders.
- Require schools to provide access to mental health services before receiving money from the secured school funds to help youth struggling with mental health concerns, including suicidal thoughts.
- Increase the age to purchase a gun to 21 and ban the sale of automatic weapons.

Free from Discrimination - You are not free if the government regulates who you love, supports programs for the one religion it prefers over others, or denies you opportunities because of the color of your skin. Our government is elected to represent all of us. Republican efforts to fund faith-based initiatives based on one faith are unconstitutional. Same sex marriage has been upheld by the U.S. Supreme Court yet Republicans

refuse to remove the ban from our books. Voluntary DEI programs should not be discouraged or banned. Democrats have always stood for individual freedoms.

- Either stop tax-funding for faith-based initiatives or make the funding available to all religions.
- Remove the ban on same sex marriage still in Indiana's code.
- Restore DEI programs so every Hoosier has the opportunity to succeed.

There is a Path Forward to a Better Indiana

On one side, Democrats file and fight for bills to lower rent, keep utility bills in check, shore up child care, and protect access to health care - all Hoosier first initiatives. On the other, a Republican supermajority advances crackdowns, power grabs and culture-wars that make government bigger and people's lives harder.

We know that Indiana Democrats are aligned with the majority of Hoosiers who just want a fair shot and a little breathing room. The Indiana Democratic Party Stands for providing Hoosiers with real solutions. Indiana deserves leaders focused on helping people build a good life here with respect and dignity.
